

NAPAS PROFESSIONAL TRAINING & EXPERIENCE PORTFOLIO

Training and experience is based on the Emergency Care & Transportation of the Sick and Injured (Tenth Edition)

This in itself will not give a qualification, it is however a method of providing additional training in order to ensure that staff within member services have access to aids that will be useful within their main occupation of transportation

There are a number of selected. Programs that will provide this interactive learning environment each can be added to the individuals portfolio by printing off the results .

from the Anatomy Review section. Then the ready for review section provides varied summaries of chapter contents.

The Assessment & Emergency Care Review provides summaries of patient assessment

Findings and emergency care procedures.. You are provided with the means to revise

It is however up to you student to provide the enthusiasm and time to revise.

The agenda for re-assessment

Emergency Care and Transportation of the Sick and Injured

Students should undertake their re-assessment chapter by chapter, some aspects are not relevant in the UK or Eire, however it will be of interest to understand how other services work in this field, many of these standards are International, and are relevant to all, the training is based on an American system, that has been reviewed and evaluated by some very top surgeons, and specialists in the USA.
